Cincinnati Lab Supply

About Cincinnati Lab Supply

1943	In 1943 Mr. Ken Carr started a business called Tasty Foods in his garage. He distributed both human and pet foods. In time the business became all pet foods.
1974	In 1974 Mr. Carr retired and sold his company to a Mr. Paul Hilliard.
1985	In 1985 Mr. Hilliard retired and sold the business to McKesson Veterinary Service.
1988	In 1988 McKesson sold the company to Hills Pet Products (Science Diet).
1993	Through all of these owners I was the only employee to endure all of the ownership changes and in 1993 I bought the company from Hills Pet Products. We continue to grow and prosper with the support of our valued customers.

-Mike Mullin

Cincinnati Lab Supply

We do our Best to be the Best - if we are not please tell us!

FEATURES & SERVICES

- Our facility is inspected and serviced monthly by Terminix Pest Control for cleanliness and proper storage of all feeds and bedding.
- Orders are packed and shipped on our trucks to ensure cleanliness and avoid breakage.
- Weekly delivery in most areas.
- We will rotate and stock your food and bedding upon request.
- Competitive Prices, Contract Pricing is available for labs only. (This allows you a lower price and guarantees it for 1 year.)
- Most products listed are always in stock for immediate delivery. A few products require advanced notice (7 days maximum) to ensure freshness.
- If there is a feed you need and it is not on the list, we can usually special order it and have it at your door in 7 days or less. (Test Diets 14-21 Days)
- Call your order in by 12:00 noon the day before your delivery.
- Office hours are 8:00 a.m. to 4:00 p.m., Monday-Friday.
- Prices are subject to change without notice. (Except contract pricing)

TERMS & FREIGHT POLICIES

- Free delivery for orders of \$200.00 or more in our delivery area. (Approximately 125 miles radius of Cincinnati, Ohio, call for specifics.) For orders less than \$200.00 there will be a \$15.00 delivery charge. Order minimum is \$100.00.
- A \$7.00 fuel and handling surcharge fee is added to each delivery.
- UPS delivery is available for any size order. A UPS delivery will be at the customer's expense and a \$1.00 (per package) handling & packing charge will be included on the invoice.
- Terms are COD or Net 30 days with approved credit.
- Visa, MasterCard and American Express are accepted.
- A finance Charge of 1 ¹/₂ % per month or 18% annually will be charged on past due balances.
- A \$22.00 Service Charge will be applied for Non-Sufficient Fund checks.

CREDIT & RETURN POLICY

- Credits for Receiving incorrect items or damaged items must be reported within 24 hours. Credits will be issued upon return of product.
- Shortages must be reported within 24 hours.

Cincinnati Lab Supply Pest Control Program

Cincinnati Lab Supply's facility is virtually rodent and insect free. In order to maintain this environment our pest control is performed by Terminix Pest Controls professionally trained technicians on a monthly basis, utilizing the most advance techniques, equipment, pesticides and knowledge of biological, ecological, and environmental considerations. This service includes the following:

- Strategically located tamper resistant rodent bait stations are located along the entire outside perimeter of the facility to provide protections against rodents gaining access from surrounding areas.
- Rodent Ketch-All trapping equipment and glue traps are located strategically throughout the inside of the facility to provide immediate rodent control.
- A map of all rodent equipment is kept on file.
- During each service Terminix Exterminator technicians check, clean, date, and initial each device and re-bait the bait stations.
- Insecticides are applied to cracks and crevices with low pressure pin stream treatment, or according to EPA approved label directions eliminating any possibility of product contamination.
- Only EPA approved pesticides will be used and Material Safety Data Sheets for all pesticides are kept on file. They will be applied in a manner that will not contaminate products or equipment as provided by Federal, State, and local laws.
- Terminix Pest Control technicians complete a log sheet for each service. This documentation includes the pesticides used, how they were applied, and the EPA registration number for each pesticide, the amount of material used and the percent of the finished product. Also any recommendations regarding sanitation, pest problems, or structural defects are included.

Our goal at Cincinnati Lab Supply is to maintain a facility that is virtually insect and rodent free. In addition to the Terminix Pest Control program, Cincinnati Lab Supply employees perform the following:

- All outside and inside devices are checked and logged weekly. Any activity is noted to pinpoint problem areas.
- All incoming products are visually inspected for infestation.
- All products are stored on pallets and pallet racking off the floor and 18" inches from the walls.
- Along the perimeter of the walls is an 18" space painted white on the floor for easy inspection of any activity.
- All doors and windows are kept shut and adequately sealed to prevent potential pest entry.
- Upon request a copy of manufacturers' quality control and pest control policies can be provided.

Cincinnati Lab Supply Sanitation and Quality Controls

Our main goal at Cincinnati Lab Supply is to maintain the highest of standards in sanitation and quality control and to maintain a virtually insect and rodent free facility. This document defines the sanitation and quality control policy.

- All certified lab chows are logged by manufactures date codes, customers name, purchase date, and quantity purchased-this enables the tracking of a particular product if necessary.
- All products are rotated by date to ensure freshness.
- The warehouse building is a modern facility constructed of concrete block and steel. The floors are smooth concrete and all joints are caulked and sealed. The outside is surrounded by blacktop.
- All foods are stored on pallets and pallet racking. There is a 18" space between the racking and the walls. Along the wall a white line 18" wide is painted on the floor for easy inspection of any insect or rodent activity.
- The floors and delivery equipment are swept daily to avoid infestation from spillage.
- All doors and windows are kept shut and are adequately sealed to prevent potential pest entry.
- All incoming products are visually inspected for damage and infestation.
- Outside surroundings are kept free of weeds and debris.
- The entire warehouse is heated and a section of the warehouse is climate controlled for feed storage to control the heat and humidity in the summer months. The average temperature is kept between 58 and 72 degrees year round.

FELINE

Mazuri Exotic Feline large and small diet is a constant formula diet supplying complete life-cycle nutrition for reproduction, lactation, growth and maintenance.

EXOTIC FELINE CANNED FOOD

(TIGERS, LIONS, JAGUARS, AND OTHER EXOTIC FELINES) Z6910 ZuPreem Exotic Feline 24/14 oz Canned 28.80

- Balanced nutrition for all life stages with no supplements required.
- Formulated to meet high-energy demands of exotic felines or obligate carnivores.
- Lower levels of magnesium and other minerals, aiding in proper urinary pH and discouraging urolith formation.
- Addition of taurine, an essential amino acid felines need for healthy eyes and hearts.

EXOTIC CANINE DIET

(WOLVES & OTHER EXOTIC CANINES)

Mazuri Exotic Canine Diet-Dry 5MN2

Mazuri Exotic Canine Diet is a constant formula diet supplying complete canine life-cycle nutrition. This is a palatable, high energy, high protein, and nutrient dense diet formulated to promote good body conditioning, good coat quality, and low stool volume.

OMNIVORE DIET

ZuPreem Omnivore Dry Diet Z6995 20 lbs 16.11

One of the original ZuPreem diets for exotic animals, Omnivore Diet Dry is still being fed almost 40 years later to bears, non-domestic canines, raccoons, wild pigs, rodents, beavers, porcupines and opossums in zoological collections.

MAZURI MINI-PIG FOOD

The Exotic Animal Feeding Resource

AAZURI	MINI-PIG FOOD	SIZE	PRICE
5Z90	Mazuri Mini Pig Youth - 4 weeks to 4 months	25 lbs	14.70
5Z91	Mazuri Mini Pig Adult - 4 months to 2 years	25 lbs	12.12
5Z92	Mazuri Mini Pig Elder - 2 years and up	25 lbs	12.20

Mazuri Mini-Pig Youth

Mazuri Mini-Pig Youth is a nutritionally complete, balanced diet for porcine species that gets young animals off to a healthy start. This product was specifically formulated to give babies a healthy start, ensuring proper growth and development early in their life cycle. This can be introduced as soon as 7 days and fed as a complete ration until the pigs are 16 weeks old.

Mazuri Mini-Pig Active Adult

Mazuri Mini-Pig Active Adult is a moderate energy, high-fiber diet for porcine species that helps promote moderate growth rate while helping to satisfy hunger. This diet can be fed to meet the nutritional requirements of adult pigs that are growing, showing or breeding. Active young adult animals up to 3 years of age should require a level of 1-2% of body weight to maintain proper condition without putting on excess fat.

Mazuri Mini-Pig Elder

Mazuri Mini-Pig Elder is a low-energy, high-fiber diet specifically formulated to maintain less active pigs at 1 1/2 years and mature pigs at 3 years or older. As the activity level of the pig decreases, all of the nutritional requirements decline.

ZuPreem Premium Ferret Diet

The best care for ferrets begins with proper nutrition. Pet owners know it takes a highly digestible balanced diet to help their pets remain strong and energetic throughout their growth and adult life stages. Premium Ferret Diet contains 40% protein and 20% fat – a more nutrient dense diet than most competitive ferret foods. High quality chicken and eggs make the irresistible taste ferrets love.

∝TestDiet

Fresh from our lab to yours[™]... More than 100 years of professional expertise, excellent service, and impeccable quality. Formulating specialty laboratory animal diets for data you can trust.

CUSTOM FORMULAS ARE AVAILABLE

Test diets are made to your specifications for any animal, you can increase or decrease sodium, fiber, fat, protein, irradiate, liquid diets, you name it. You can get from 1 kilogram to 1000+kilograms. Call us today for a quote!

The TestDiet[®] division of LabDiet[®] is a Purina Mills, LLC / PMI Nutrition International company. We formulate and produce custom purified-ingredient and grain-based diets for animal research in academic, government, and pharmaceutical laboratories around the world for their specific areas of study.

All diets are produced under the strict requirements of the International Standards Organization (ISO-certified), which meet or exceed the demands of Good Manufacturing Practices and Good Laboratory Practices. We operate the cleanest, most efficient, most comprehensive GMP-compliant, GLP-compatible, ISO-certified lab animal diet production facility in the world to produce any and every custom diet formula presently or previously available from any manufacturer.

Advanced Protocol is a new line of diet options for new directions in research. It's designed to give scientist conducting today's targeted studies all the advantages of using a proven LabDiet

Advanced Protocol from LabDiet, we're advancing with you!

At Purina Mills (PMI[®]), there's nothing we value more than the trust of the research community. Cultivated over more than 60 years, it's a legacy unmatched in the industry. Today, the legacy continues --- with Advanced ProtocolTM.

Call a LabDiet[®] scientist at 314-317-5178 or 800-227-8941 for more information!
