DRY CAT FOOD - DAD'S

While cats are finicky eaters, they require wholesome, nutritious foods to lead healthy, active lifestyles. At DAD'S Pet Care nutritional experts have developed a variety of high-grade foods that provide both the big taste the cats love and the essential nourishment they need.

Dad's Original is fortified with taurine to give cats a healthy heart, vitamin A for bright eyes, and vitamin E for its antioxidant benefits. Dad's original is also known for its easy-to-chew, star-shaped pieces that cats can't wait to eat.

		Pro	Fat	Fib

5Z91 Mini Pig Adult - 4 mths to 2 yrs	25 lb	13.62
5Z92 Mini Pig Elder - 2 years and up	25 lb	13.62

Mazuri Mini-Pig Youth

Mazuri Mini-Pig Youth is a nutritionally complete, balanced diet for porcine species that gets young animals off to a healthy start. This product was specifically formulated to give babies a healthy start, ensuring proper growth and development early in their life cycle. This can be introduced as soon as 7 days and fed as a complete ration until the pigs are 16 weeks old.

Mazuri Mini-Pig Active Adult

Mazuri Mini-Pig Active Adult is a moderate energy, high-fiber diet for porcine species that helps promote moderate growth rate while helping to satisfy hunger. This diet can be fed to meet the nutritional requirements of adult pigs that are growing, showing or breeding. Active young adult animals up to 3 years of age should require a level of 1-2% of body weight to maintain proper condition without putting on excess fat.

Mazuri Mini-Pig Elder

Mazuri Mini-Pig Elder is a low-energy, high-fiber diet specifically formulated to maintain less active pigs at 1 1/2 years and mature pigs at 3 years or older. As the activity level of the pig decreases, all of the nutritional requirements decline.

DEER FEED - PURINA BLOCKS

548A Purina Premium Deer Block-handle	20 lb	11.60
548E Antler Max Deer Block	33 lb	13.64

Most deer prefer protein and energy-rich foods such as browse, leafy plants, and acorns to more fibrous grasses. Mother Nature typically provides nutrients through this natural forage to SUSTAIN a deer population. But rather than merely sustaining deer, most people are interested in growing them to their maximum genetic potential.

Supplemental feeding can be the difference between an average deer and the world's biggest deer. Plus, supplemental feeding also helps deer live better, healthier lives.
